## Future Skills Questionnaire – raising the profile of CEIAG

Being new to post in September 2024, Caroline wanted to gain an accurate picture of the learner experience of CEIAG at The Stonehenge School. She also wanted to quickly raise her profile with learners, particularly as she had worked in a different role at the school previously. Delivering FSQ to all learners has allowed Caroline to do this, helping learners identify and associate Caroline with CEIAG, whilst also establishing an environment in which meaningful conversations about careers can take place.

## What impact has FSQ had on both the learners and the school?

FSQ and wider usage of Compass+ has given The Stonehenge School a stable foundation upon which to build and develop CEIAG.

Despite being in its first year of delivery, FSQ has already had a significant impact. Alongside the Compass Evaluation, the FSQ data captured has been instrumental in informing meetings with SLT that have led to changes in the existing careers programme and in the wider curriculum.

Caroline can also see the potential for powerful, impactful data over time, as learners' careers journeys from Years 7 to 11 are tracked and a cumulative picture of their progress can be created.

## How has the Future Skills Questionnaire been delivered?

Caroline has an ambitious vision for FSQ with a planned roll-out to all learners. Prior to delivery, letters are sent home to parents/carers that both introduce Caroline in her new role and explain the process and benefits of FSQ. Learners then complete FSQ during a designated lesson on a rota basis so that Caroline can be on hand to ensure clarity of message and to provide support if required.

Caroline considers the 'FSQ learner engagement animation' to be an excellent learner-friendly resource to use, as learners find it relatable, engaging and informative.
